This year funding for community services recipients with behavioral health and intellectual disability needs is threatened with devastating cuts. Providers, consumers and family members will gather on June 5th to take part in a crucial legislative effort to ensure legislators know how critical this funding is to his/her constituents. PCPA has partnered with many concerned associations and advocacy groups to fight for a realistic budget that offers supports required by Pennsylvanians receiving behavioral health, intellectual disability and autism supports.

YAP is registered to be a part of this event and **WE NEED YOU** there to demonstrate your support for services, voice your concern regarding the proposed budget cuts, and to speak with legislators about your experiences!!
